

## **NCETM**

### **Support for maths learning and teaching during school closures**

While schools are closed, all teachers, parents and children face a completely new situation. In this area <https://www.ncetm.org.uk/resources/54430> of the NCETM website, we'll do our best to offer our help to keep maths learning going while children and teenagers are at home. There'll be plenty on these pages for teachers: our normal audience. But, in these special circumstances, parents are equally welcome. We'll start to put material on these pages in late March/early April. Advice on materials may change over time, in particular in response to any Government activity in this area. If this happens, we'll let you know.

## **Maths Hubs**

Following advice from DfE, Maths Hubs in Lancashire and West Yorkshire are not currently providing face-to-face support but are currently looking at the feasibility of enhancing online and other support, for the summer term.

### **Maths SLEs invited to register interest in a school improvement programme with their local Maths Hub:**

A register of [Expression of Interest](#) has opened for a tailored programme, run by the Maths Hubs Programme, to support Specialist Leaders of Education (SLEs) in maths to develop their school improvement work. In 2020/21, four cohorts of SLEs (in the North, Midlands, South and South-West) will each collaborate in three workshops, convened and led by the National Centre for Excellence in the Teaching of Mathematics (NCETM). The programme is designed to enable SLEs from both primary and secondary schools to develop maths-specific leadership capacity and capability in the schools they support. This is a fully funded programme with some financial support also provided to enable the release of SLEs to take part. More information and an expression of interest form can be found on the [SLE Development Programme](#) web page.

### **Application window is open for Secondary Mastery Specialists:**

Want to become an expert in teaching for mastery and work towards taking it beyond your own school? Train to become a Secondary Mastery Specialist. In this role you will receive fully funded training from experts, develop your own expertise, and then support others. Recruitment for Secondary Mastery Specialists to begin their training in 2020/21 is now open and closes on 22 April. Please read the information here <https://www.ncetm.org.uk/resources/53452> and follow the link at the end to submit your application.
